TERMS & CONDITIONS

Returned Goods

Products will only be accepted for return by the Customer upon approval by Roland DG. All products approved for return must be accompanied by a Return Authorisation form (RA) provided by Roland DG.

Except for products deemed to be faulty by Roland DG, an Return Authorisation will only be considered if;

1. products are returned in a saleable condition within thirty days of invoice date ;
2. a 20% restocking fee is to be paid by the Customer.
3. please contact sales@rolanddg.com.au for RA

Any products returned without a Return Authorisation will be returned to the Dealer. All freight costs will be deemed the responsibility of the Customer unless otherwise agreed.

Order cut-off times

Please ensure all product codes and pricing are correct when placing orders

Any orders with incorrect pricing will be returned and an amended PO with correct pricing is to be submitted

Any order processed after 12.00pm will be dispatched the following day

If there is an urgent requirement for an order placed after 12.00pm, Roland DG will endeavour to accommodate requests where possible but not guaranteed.

Invoices

Invoices are processed and sent out on the following day of goods being despatched.

Shelf Life and Storage of UV cartridges

ECO-UV inks: due to strict storage guidelines, Roland DG suggest ECO-UV inks are ordered and drop shipped directly to your customers to ensure maximum shelf life. Should you wish to store ECO-UV inks, it is the dealer's responsibility to ensure ink storage guidelines are adhered to. ECO-UV inks shipped directly from Roland DG, we will strive to supply the maximum shelf life at the time of order, when possible, but in some cases due to shipping or stock availability we will supply a minimum of 2-months shelf-life (from shipment date) , unless otherwise notified by Roland DG prior to shipment. No credits or returns will be accepted for inks below the 2-month expiry that have reached their use by date due to stock procedures at dealer warehouse. Note, the shelf-life for ECO-UV inks is 12 months (EUUV4/EUUV45) and 15 months (EUUV & EUUV3).

FREIGHT

Roland DG endeavours to minimise all freight charges and no claim will be accepted from any *Customer* for excessive charges made. If the *Customer* wishes to organise an alternative freight company, Roland DG will comply with the *Customer's* instructions but cannot accept responsibility for the goods once they have left the pick-up location. If the *Customer* requests a third party freight company used, all insurance coverage whilst being transported is deemed to be the *Customer's* responsibility. All orders will attract a minimum freight charge as set by Roland DG and communicated in advance to the dealer. Roland DG considers orders sent by Australia Post to be that of a third party and will not be responsible for delivery or insurance.

Please note, a \$60 dangerous goods surcharge applies for EUV inks (EUUVBK/CY/GL/MG/WH/YE) in addition to the standard freight charge.

Freight Quotations

When a freight request quotation is requested

A freight quote will be supplied with a reference number and an quote expiry date

The reference number must be included on the purchase order when submitted

Failure to provide Freight reference number with PO , can result in freight charge variance which will be valid

While we request delivery times of the 3rd party transport companies to be in certain time period , some delays in delivery times can occur (please note that COVID-19 workplace restrictions are in place with some of our logistics partners, and deliveries may take slightly longer than usual)

Freight Consignment numbers will be emailed to the nominated email address the following day once goods have been dispatched.

Warranty Conditions

All printers that have been transferred or sold to a different location , must be decommissioned and recommissioned by a Roland DG Service Technician or authorised service agent for warranty to apply

All printers that have been on sold must be registered with Roland DG for warranty to be transferred or applied

Failure to do so will result in the warranty being void as per the warranty terms and conditions

<https://www.rolanddg.com.au/support/warranties>

Roland DG Engage

All installations must be performed by a Roland DG certified installer, or an authorised Roland DG technician.

All Roland DG Engage installs are to be booked via the online request form here: <https://www.rolanddg.com.au/support/engage-installation-request>

Shelf Life and Storage of UV cartridges

ECO-UV inks: due to strict storage guidelines, Roland DG suggest ECO-UV inks are ordered and drop shipped directly to your customers to ensure maximum shelf life. Should you wish to store ECO-UV inks, it is the dealer's responsibility to ensure ink storage guidelines are adhered to. ECO-UV inks shipped directly from Roland DG, we will strive to supply the maximum shelf life at the time of order, when possible, but in some cases due to shipping or stock availability we will supply a minimum of 2-months shelf-life (from shipment date), unless otherwise notified by Roland DG prior to shipment. No credits or returns will be accepted for inks below the 2-month expiry that have reached their use by date due to stock procedures at dealer warehouse. Note, the shelf-life for ECO-UV inks is 12 months (EUV4/EUV45) and 15 months (EUV & EUV3).
