Outstanding Color

New TrueVIS TR2 ink for Vibrant Color

In addition to seven colors and White, the new TR2 ink supports Orange ink to further increase color gamut. Orange in general adds high visibility and impact to printed graphics and offers a warm and welcoming glow with positive emotions to communication tools or corporate identities. To maximize the effect of this new color ink, a new Multi Process Color Function has been developed to enable using Orange ink as a process color. It enables you to express even richer colors without any special spot-color setting requirements.

Enhance your Business with "True Rich Color"

In order to take full advantage of the VG2/SG2 series' superior color reproduction capability and the wider color gamut provided by new TR2 ink, we developed a True Rich Color preset. Now vibrant color can be combined with neutral grays, smooth gradations and natural skin tones to create stunning graphics. This pioneering print quality is unequalled for durable graphics.

Highly Reliable Print & Cut Production

Print & Cut

Automated Long-run Decals/Labels Production

When multiple copies of stickers, decals, and labels are produced, the shorter the job length is, the higher print & cut accuracy becomes. Using the Multiple Print function allows the printer to automatically conduct highly accurate printing and cutting for a group of labels several times without the need of using crop marks. The combination of a new precision media take-up system with highly accurate print & cut functionality enables the production of longer-run unattended jobs.

Lengthy Print & Cut Jobs with Crop Marks
Print all copies and cut them afterwards.

Eliminate Trimming with Perforated Cut

The improved cutting control technology of the VG2/SG2 series introduces a precision Perforated Cut function for producing die-cut, ready-made labels/decals without the need of a post-trimming process. Since the perforated cut can also be applied to contour cutting, it can produce unique, custom-shaped stickers ready to be shipped. This eliminates the post trimming process and supports short turn-around jobs.

Reliability, Durability and Safety

The VG2/SG2 series with new TR2 ink is certified for long-lasting results by 3M™ MCS™ Warranty, providing your customers with the assurance of the quality and reliability of their graphics. It is also certified by the Avery ICS Performance Guarantee which provides protection for up to 4 years outdoors and up to 7 years indoor. Graphics produced with TR2 inks are Greenguard Gold certified to be safe when used indoors at schools or hospitals.

Two Take-up Modes
A new take-up unit supports two modes according to the type of media chosen, securing take-up stability for smooth post processing.

Nozzle- Mask Function
A Nozzle Mask function allows you to continue printing even when a nozzle is clogged with ink.

New Media Clamp
A new media clamp allows sheet cutting without removal.

VersaWorks 6 to Accelerate your Printing Business

The new VersaWorks 6 bundled RIP software is designed to simplify operation while maximizing the power of your VG2/SG2 series and other Roland DG devices. A Harlequin RIP dual-core engine with support for PDF 2.0 and native 64-bit processing provides accurate rendering of PDFs with shadows and transparencies.

- An icon-based interface with drag-and-drop functionality facilitates ease of use
- Five print queues and the ability to save and store unlimited queue settings
- Special Color Plate Generation lets you auto-generate White ink layers
- Built-in Pantone® and Roland Color spot color libraries
- Easy printer color matching for consistent colors

*1 The media holders of this machine are designed to be used exclusively with media that has a paper tube (core) with an inner diameter of 3 inches. To use 2-inch media, the optional media flanges are required. *2 The length of printing or cutting is subject to the limitations of the program. *3 · 500 gf is the maximum instantaneous blade force. · The blade force must be adjusted according to details such as the media thickness. *4 · Media type: Media specified by Roland DG Corporation · Temperature: 25°C (77°F), humidity: 50%RH · Roll media must be loaded correctly. · Applicable when all pinch rollers that can be used with the media width are used. · Side margins: 25 mm (1.0 in.) or more for both the left and right margins · Excluding expansion/contraction of the media · Not assured when the print heater or dryer is used. · Assumes all correction and adjustment functions of the machine have been used properly. *5 · Print travel: 1 m (39.4 in.) *6 · [PREFEED] menu item must be set to "ENABLE." Range for assured repetition accuracy · For media with a width exceeding 610 mm (24.0 in.): Length: 4,000 mm (157.5 in.) · For media with a width of 610 mm (24.0 in.) or less: Length: 8,000 mm (315.0 in.) *7 · Provided that the media feed length is 3,000 mm (118.1 in.) or less · Excludes the effects of slanted movement and of expansion and contraction of the media *8 · Data size: 64-inch model 1,000 mm (39.4 in.) in the media-feed direction, 1,600 mm (63.0 in.) in the carriage-movement direction 54-inch model 1,000 mm (39.4 in.) in the media-feed direction, 1,346 mm (53.0 in.) in the carriage-movement direction · No lamination · Automatic detection of crop marks at 4 points when media is reloaded · During cutting, [PREFEED] menu item must be set to "ENABLE." · Excluding possible shift caused by expansion/contraction of the media and/or by reloading the media. *9 · Warm-up is required after power up. This may require 5 to 20 minutes, depending on the operating environment. · Depending on the ambient temperature and media width, the preset temperature may fail to be reached.

About White Ink Due to the nature of white ink, the pigment in this ink will settle in the cartridge and ink flow system, requiring you to shake the cartridge before each use. Outdoor durability is three years for CMYKLcLmLkOr inks, and one year for white ink, depending on the media used.
